Visionary Strategies.
Flawless Execution.

You need a partner who can help you increase your enterprise's speed and agility to meet the rapidly changing expectations of today's consumer.

cimphoni

Transforming Enterprises Through the Application of Emerging Technologies and Experienced Leadership.

Information technology pervades nearly every aspect of business today and is the critical ingredient in your ability to compete. Your customers expect you to incorporate technology into your products and services in a way that improves their lives - technology that is simple, relevant, timely and reliable. They have no tolerance for a poor experience and will quickly move on to other options.

On top of these expectations, existing and emerging competitors are quickly redefining business models and go-to-market strategies. They are using cognitive tools to understand and predict consumer behavior and digital platforms to engage with their customers. Today, nearly every customer transaction leaves a digital trail of data that can be "mined" for customer insights.

Companies that are able to sense and respond to marketplace trends quickly will be the winners. "Speed and agility" is the next competitive differentiator.

Addressing these challenges can be daunting. We can help. Let us show you how.

Our Services

STRATEGIC CONSULTING

Cimphoni's consultants bring a track record of success in both business and IT leadership roles. They recognize that the integration of business and IT is no longer optional as technology underpins much of what makes business competitive today. Cimphoni has the experience and credibility to serve as a unifying voice between these two groups. Our unique combination of business expertise and technical know-how enables us to consistently deliver truly transformational business outcomes. Our strategic consulting services include:

- Digital Transformation
- Customer Experience
- Critical Initiative Leadership

IT TRANSFORMATION

The consultants at Cimphoni have experience leading large and dynamic organizations and have the skills needed to drive immediate impact while establishing the foundations for sustainability and scale. From experienced interim leaders establishing culture and agility, to strategic leaders designing adoption strategies for microservice architectures and modern classes of code, Cimphoni has the leadership needed to transform your organization's technology function. Our IT transformation services encompass:

- Interim CIO, CTO & CDO
- Future Technology Framework
- IT Performance Improvement

INTELLIGENT ENTERPRISE

The next generation of enterprise performance will take today's priority of digital transformation across the organization a step further – becoming an Intelligent Enterprise. The Intelligent Enterprise will be able to anticipate and meet both real time and predicted customer demands. Machine learning and data-driven insights regarding customers, products, services and solutions will fundamentally alter how business is done. Intelligent Process Automation will eliminate repetitive non-value-added activities. We can help you unleash the potential of the Intelligent Enterprise with:

- Advanced Analytics
- Artificial Intelligence
- Intelligent Process Automation

About Cimphoni

Cimphoni is built on the premise that technology, when properly applied and led, can deliver innovative solutions that transform businesses, enrich the products we use daily and improve the quality of our lives. The Cimphoni team is comprised of highly experienced technology and business leaders with a thirst for innovation and a passion for solving problems. Founded in 2012, we serve customers throughout the United States from our offices in suburban Milwaukee.

INNOVATE + **ENABLE** + **TRANSFORM**

We start with experienced "operators" that bring a hands-on approach to improving business and IT performance.

We challenge the status quo through innovative approaches that continually improve the business value delivered by IT.

We deliver practical, technology-enabled solutions to address our clients' critical business needs while delivering successful outcomes.
