# Artificial Intelligence

Artificial intelligence is likely to be the most disruptive force in the next decade and companies that take a wait and see approach risk being left behind.

Hype abounds, but in the end it is about achieving business goals. Enough of the core technologies have now been proven out that it is only a matter of time before enterprise adoption/ disruption takes off. Rapidly evolving AI capabilities are being used to reinvent business strategies and deliver new competitive differentiations. Whether you are just trying to figure out where to start or have completed several pilots and need to implement AI solutions at scale, Cimphoni can guide you through the process.

It is estimated that AI solutions will generate over $50 billion in the next two years alone and that 2/3 of the newly addressable markets will have been taken by the digital leaders within 3 years.

## Cimphoni offers its clients the following Artificial Intelligence services:

- Educational Presentations/Workshops
- AI Use Case Development
- Platform, Architecture & Tool Selection
- Snapshots & Data Viability Assessments
- Pilot Projects & Proof of Concepts (POC)
- Enterprise Deployment at Scale

Cimphoni has the expertise to help regardless of where your organization stands today from an AI maturity perspective. We also offer Advanced Analytics and Intelligent Process Automation as part of our suite of Intelligent Enterprise services.  Isn't it time to transform your business into an Intelligent Enterprise?
